1.0 Scope

1.1 The scope of this policy will be all of the policies, procedures and processes of Achieve More Training.

2.0 Context

Net-zero

In June 2019, the UK became the first major country to legislate for a net-zero target for carbon emissions by 2050. Government needs to shape policies and regulations to create a market environment that increases consumer and business demand for low-carbon solutions and encourages sustainable private sector investment decisions. Policies across all areas of government interact to influence the transition of the whole economy towards net zero. Full report here - [Achieving net zero carbon emissions through a whole systems approach](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/812222/Achieving-net-zero-carbon-emissions-through-a-whole-systems-approach.pdf) - GOV.UK (www.gov.uk)

3.0 General

4.1 This policy will be implemented in accordance with all existing and emerging legislation.

4.2 The sustainability strategy for Achieve More Training is implemented through three main activity types undertaken by our Organisation.

- curriculum development and implementation
- business engagement
- internal business operations

Each of the above activity types covers multiple activities and processes. Some of which Achieve More Training is solely responsible for and others we either collaborate on or adhere to as responsibility is with another organisation. Throughout our activities we commit to referring to and implementing where possible the '5 r's' of refuse, reduce, reuse, repurpose and recycle, ensuring our approach to improving and sustaining our environment whilst achieving efficiency gains for Achieve More Training.

4.3 Achieve More Training will aim to:

- Comply with and, where practicable, exceed all relevant regulatory and legislative requirements.

- Take into consideration the options related to refuse, reduce, reuse and recycle in all of its policies, procedures and processes.
- Prevent polluting practices and activities
- Set stretching targets and actions to ensure a continuous reduction of the valuable resources we use supported by effective monitoring arrangements.
- Ensure our curriculum meets the needs of all learners and other stakeholders in the area of sustainability, environment, land-based occupations and food.
- Develop and deliver programmes that suit the needs of existing and emerging industries and communities.
- Engage with and proactively collaborate with communities and external organisations who share similar aims to our own
- Strive for continual improvement in our environmental performance and prevention of pollution
- Establish ourselves as a beacon of good sustainable business practice.
- This policy will be implemented through the delivery of a Sustainability Strategy

5.0 Monitoring and Review

This Policy has been supported by the Directors and be reviewed on an a Bi-annual basis.
